

How Swisslog delivers future proof solutions by committing to supply chain sustainability

“Sustainable procurement is fundamentally important for every business today. It saves money, reduces waste, improves competitiveness, and builds a business reputation. Even more important, it helps to ensure a better life for generations to come.

As a turnkey provider, it is essential Swisslog partners with the best suppliers for our business. Together we ensure that all services and solutions made internally and by our suppliers meet our sustainability requirements.”

Sourcing & Supply Chain at Swisslog

Objective

Operating in a competitive industry, Swisslog is convinced that supply chain sustainability is key to delivering futureproof and energy-efficient solutions, and it is also an essential part of achieving and improving Swisslog’s sustainability goals. The company is committed to meeting the sustainability needs of its customers and was looking for a solution to help them extend this responsibility to the global supply chain.

How IntegrityNext Helps

Swisslog uses IntegrityNext to screen suppliers in all relevant sustainability and product compliance areas, ensuring a sustainable supply chain, which in turn has a positive impact on the value chains of its customers such as Nestle and Coca Cola. IntegrityNext enables Swisslog to collect, analyse and harmonise supplier sustainability data as a basis for purchasing decisions. The company uses the IntegrityNext report to disclose its efforts to existing and prospective customers.

About Swisslog

Industry	Automation
Annual Revenue	700 m €
Employees	2,900
Geographies	Global
Active Suppliers	389

Challenges

- Engage with a large global supplier base to collect and analyse supply chain sustainability data
- Aggregate global supplier data as a basis for purchasing decisions
- Meet heightened customer demands for supply chain sustainability

Benefits

Improved supplier collaborations

Thanks to no supplier fees and the automated invitation and reminder process. The company was also able to significantly reduce their manual efforts as the suppliers register and fill-out the questionnaire by themselves.

ESG Compliance

Swisslog is able to ensure compliance with the “German Supply Chain Act” as the comprehensive structure of the platform covers all relevant ESG topics.

Easy integration

The IntegrityNext solution with real-time updated data enables seamless integration into SAP or Kodiak via API interface.
