

GRI-compliant supply chain reporting to drive ESG-focused investing

“With ESG investing on the rise, investors are looking more closely at companies and their supply chains in terms of sustainability. IntegrityNext provides us with meaningful KPIs to demonstrate and report on sustainability in our supply chains.”

Raimund Wind
Chief Procurement Officer

Objective

Jenoptik is a globally operating technology group focusing on optical technologies with its headquarter in Jena, Germany. As a listed company, and with ESG investing on the rise, Jenoptik recognizes supply chain sustainability as an important value driver.

The company was looking for a platform solution to track and monitor sustainability as well as other ESG topics in its supply chain.

How IntegrityNext Helps

Jenoptik uses the IntegrityNext solution to monitor its suppliers regarding key sustainability topics adhering to international standards and regulations.

IntegrityNext provides Jenoptik with data on sustainability performance that is automatically aggregated in a pre-built CSR report that covers all supply chain related KPIs from the GRI Standards. Jenoptik uses the data for internal and external reporting.

About Jenoptik

Industry	High Tech
Revenue in 2022	981 m €
Active Suppliers	> 3,000
Geographies	Global

Challenges

- Monitor and track supply chain sustainability performance
- Create a reliable sustainability data basis for purchasing decisions, internal processes and reporting

Benefits

High response rate

Thanks to no supplier fees and ease-of-use, Jenoptik achieves a supplier response rate of 86 %.

Improved performance

IntegrityNext enables Jenoptik's buyers to take follow up actions via the platform, improving supply chain sustainability over time.

Scalability

In a next step, Jenoptik plans to extend the monitoring to more suppliers which can easily be added with minimal effort.

GRI-certified reporting

IntegrityNext allows Jenoptik to report on supply chain sustainability in compliance with the GRI Standards, providing meaningful and comparable KPIs for public reporting.

Increased transparency

Investors gain increased insight into Jenoptik's sustainability strategy and performance to form their investment decisions.
