

# Setting up sustainable supply chains to prepare for the Supply Chain Act

“IntegrityNext allows us to create transparency and better monitor and evaluate our suppliers with regard to key sustainability and compliance aspects. With IntegrityNext we also fulfill the core elements of the Supply Chain Due Diligence Act.”

**Kristina Haibel**

Specialist Procurement Sustainability

## Objective

As a direct supplier to premium car manufacturers such as Audi, BMW, Jaguar Landrover, Mercedes-Benz, Porsche and Tesla, Dräxlmaier must meet high sustainability standards for its entire supply chain.

The company needed a solution to evaluate existing and potential suppliers regarding key sustainability and compliance topics as a basis for sourcing decisions and effective risk management, and to proactively prepare for the requirements of the German Supply Chain Act.

## How IntegrityNext Helps

Dräxlmaier uses the IntegrityNext assessments to collect sustainability data and LkSG relevant information from its suppliers in a standardized way.

The IntegrityNext status and the Code of Conduct form the S-Check for each supplier. It is queried and automatically displayed in S/4HANA, allowing Dräxlmaier to easily see where action is necessary.

The IntegrityNext data is also integrated into the risk management system, enabling sustainability KPIs to be readily visible alongside financial and business KPIs.

## About Dräxlmaier

Industry	Automotive
Geographies	Global

## Challenges

- Meet requirements of the German Supply Chain Due Diligence Act (LkSG)
- Evaluate supplier sustainability performance
- Embed sustainability aspects in supplier management and risk management

## Benefits

### Increased transparency

With IntegrityNext, Dräxlmaier is able to significantly increase transparency about sustainability performance and risks in the supply chain.

### Full support

Regular calls with the IntegrityNext experts help work through challenges such as onboarding and supplier development, and allow Dräxlmaier to help shape the development of the solution.

### LkSG compliance

By using the IntegrityNext assessments and monitoring, Dräxlmaier fulfills core elements of the German Supply Chain Act.

### Fully integrated

Via API, suppliers are invited directly from S/4HANA to IntegrityNext. The data is then fed back as part of the S-Check and is additionally integrated into the company's risk management system.
