

An ambitious operation to advance sustainability in procurement within a year

“With IntegrityNext we can engage our procurement teams around the world to drive sustainability and have all data in one place, which we can then use to define actions, benchmark and report.”

Ingo Grashorn
Senior Vice President, Head of Global Purchasing

Objective

Evotec was looking for a solution to support their roadmap to more sustainability in procurement, that included multiple steps over the course of one year. In a first step, the company wanted to decentralise responsibility and engage all country procurement teams to handle sustainability assessments of their respective supplier base. Secondly, sustainability criteria should be embedded into the onboarding process. Based on the collected data, Evotec then wanted to evaluate performance, take corrective actions and report internally and externally.

How IntegrityNext Helps

IntegrityNext provides Evotec with an all-in-one solution that supports each step of the roadmap. All procurement teams assess their existing suppliers using the pre-built questionnaires on multiple ESG topics. By making use of IntegrityNext’s standard integration into Coupa, Evotec easily embeds sustainability into the onboarding of new suppliers, too. The platform aggregates all supplier data across all teams in a dashboard and generates an automatic report that helps Evotec define actions and delivers the necessary documentation and KPIs.

About Evotec

Industry	Biotechnology
Employees	4,500
Geographies	Global

Challenges

- Manage supply chain sustainability consistently across multiple procurement teams and regions
- Embed sustainability in procurement and reporting processes

Benefits

Multi-user approach

All of Evotec’s procurement teams have adopted IntegrityNext and can manage their supplier base individually within the platform.

Easy integration

Seamless integration into Coupa which allows Evotec to easily embed sustainability criteria into the supplier onboarding process.

Increased response rate

Thanks to no supplier fees and ease-of-use, Evotec was able to significantly increase the supplier response rate of its ESG assessments.

Benchmarking

The IntegrityNext report provides Evotec with reliable KPIs for benchmarking and internal and external reporting in line with the GRI Standards.
