

Fit for the German Supply Chain Act with IntegrityNext and 4EBIT

“The combination of key figures for sustainability, compliance and profitability within one single platform allows us to monitor our suppliers with minimal effort and gives us the transparency for optimization. This greatly improves our procurement performance.”

Inga Meng
Global Purchasing & Controlling

Objective

Big Dutchman company uses the IntegrityNext and 4EBIT solutions in order to meet due diligence obligations in the short term and establish a strategic supplier management in the long term. Integrating IntegrityNext data into the 4EBIT platform allows Big Dutchman to combine economics and sustainability, while laying the framework for sustainable transformation within its supply chain.

How it works

Big Dutchman uses the IntegrityNext assessments to monitor its suppliers regarding the risk areas relevant to the LkSG, such as Human Rights & Labour, Environmental Protection and Health & Safety.

The IntegrityNext data is integrated into the 4EBIT platform via API.

The 4EBIT-Platform visualizes and combines IntegrityNext sustainability data with Big Dutchman's economic data and KPIs within one platform.

About Big Dutchman

Industry	Pig Equipment
Annual Revenue	985 m €
Active Suppliers	1,468
Geographies	Global

Achievements

- Met requirements of the German Supply Chain Act (LkSG) effortlessly with IntegrityNext
- Used LkSG obligations as an opportunity to move from operational to strategic level, combining sustainability and economic priorities
- Established optimal and sustainable strategic supplier management with 4EBIT

Integration Benefits

Less touch points

With just one platform, Big Dutchman manages its purchasing while keeping a constant eye on the sustainability performance of its suppliers.

Regulatory compliance

The integration allows Big Dutchman to easily analyse and determine the economic scope of potential LkSG-related red flags at all times.

Drive ESG performance

Big Dutchman can easily set, monitor and manage tasks for sustainable supplier development within the platform.

Full transparency

User-friendly platform keeps supplier management fully transparent at all times.
